### 5. FIRE FIGHTING MEASURES

<b>NFPA Rating:</b>	<b>Health: 0</b>	<b>Fire:0</b>	<b>Reactivity: 0</b>
<b>Autoignition:</b>	N/A		
<b>Flash Point:</b>	N/A		
<b>Flammability Limits</b> <b>(% of Volume in air):</b>	Lower: N/A	Upper: N/A	
<b>Extinguishing Media:</b>	Use water fog, foam, carbon dioxide, or dry chemical.		
<b>Special Protective Equipment:</b>	Wear self-contained, positive pressure breathing apparatus and full fire fighting protective clothing.		
<b>Fire Fighting Procedures:</b>	Keep upwind. Isolate hazard area. Avoid inhalation of smoke and fumes. Use water or foam to reduce fumes. Do not touch spilled material. If possible, move containers from area. Extinguish only if flow can be stopped. Use flooding amounts of water as a fog. Cool containers with flooding amounts of water from as far a distance as possible. Avoid breathing vapors.		
<b>Unusual Fire/Explosion Hazards:</b>	Burning product may produce irritating or poisonous gases. Runoff from fire control area or dilution water may cause pollution. If surface water is contaminated, contact local authorities.		

### 6. ACCIDENTAL RELEASE MEASURES

#### Observe precautions in Section 8: Personal Protection

Stop the source of the spill if safe to do so. Contain the spill to prevent further contamination of the soil, surface water, or ground water.

**GENERAL & DISPOSAL:** Wear appropriate protective clothing and personal protective equipment. Keep away from drains, surface and ground water, and soil. Keep all sources of ignition away from the spill, and avoid creating dusty conditions when handling this material. If heavy dusting cannot be avoided, ground all equipment.

#### LAND SPILL OR LEAK:

**Containment:** Shovel or sweep the spilled material into covered containers for proper disposal. If possible, reuse the material for its intended purpose.

**Cleanup:** Rinse the spill area and any tools or implements several times with soapy water. Contain and absorb this rinseate with inert absorbents and place into the same covered containers as the spilled material. Spills to the soil can be shoveled directly into covered containers for disposal. If the spill occurred to a body of water, notify the appropriate authorities downstream of the spill so that they can decide what if any further action is needed. Depending on local spill reporting requirements and the amount released to the environment, it may be necessary to notify the regulatory authorities.

**Ventilation:** Local exhaust ventilation should be used to maintain exposure below 1.4 mg/m<sup>3</sup>, and to control the generation of airborne dust at points of transfer or other points where full enclosure is not feasible. When engineering control is not feasible and employee exposure exceeds 1.4 mg/m<sup>3</sup> wear a NIOSH approved pesticide respirator.

**Skin Protection:** Wear long sleeves and pants or overalls, chemical-resistant gloves and shoes with socks.

**Other/General Protection:** Avoid contamination of feed and foodstuffs. If exposure limits may be exceeded, wear a dust/mist filtering respirator. (MSHA/NIOSH approval number prefix TC-21C), or a NIOSH approved respirator with any N, R, P or HE filter. Do not apply this product in a way that will contact any person or pets, either directly or through drift. Keep people and pets out of the area during application.
